Subject Fw: CASTNET Site Information

Hi Chris and Marcus,

Doug Watson from the Kansas Dept of Health and Environment requested that we pre-flag some ozone data for the CASTNET site KNZ184 from 2011 (April?). Doug can give you the specific dates, he is currently writing up a proposal for an exceptional event and was just recently informed that CASTNET ozone data are to be used in a compliance fashion. Doug tried to pre-flag the ozone data for the CASTNET site, but he did not have the appropriate permission.

Please coordinate with Doug to pre-flag these data.

Thank you both,

Tim

Subject: CASTNET Site Information

Hey Tim,

Thanks for taking my call. If you could forward us the contact information we need to get permission to flag data in AQS for the CASTNET site here in Kansas (Konza Prairie KNZ184) that would be appreciated.

-Doug
